

Shape Foam

thermoformable

breathable

absorbent

Description Foam made by synthetic latex, designed for moulded footbed.

Characteristics The *thermoformability* makes unique this latex foam. The innovative mixture of raw materials allows to realized anatomical footbed maintaining the typical elasticity of the latex.

The *breathability* is ensured by the open-cell structure, which also allows the *absorption* of skin moisture and subsequent desorption.

Composition

5 % Polyester;
95 % Synthetic Latex;
