Non-woven fabric support

Maxim 617	0.65	▼	0.75	Maxim 624	1.45	▼	1.55
Maxim 618	0.75	▼	0.85	Maxim 625	1.75	▼	1.85
Maxim 619	0.95	▼	1.05	Maxim 628	1.90	▼	2.10
Maxim 620	1.15	▼	1.25	Maxim 630	2.20	▼	2.40

Way of using

The material is dipped into solvent manually or with a special machine. Put the material between upper and lining as soon as it keeps the adhesive power.

Lasting

All operations of lasting must be made till article keeps its softness. The type of solvent establishes the working time. The shoe can be pulled out from the last only after the evaporation of the solvent, when the counter reaches its characteristic stiffness.
