

## TERMO-GI 202

**TERMO-GI 202** is a thermoplastic adhesive co-polyamide based extruded into rod shape and used by the automatic lasting machines in the footwear industry.

Thanks to its quick setting time, its good flexibility, its excellent wettability and its high adhesion to leather and to both synthetic and regenerated materials, TERMO-GI 202 is the ideal adhesive for the shoe manufacturing.

Due to the wide variety of materials used in the today's footwear construction, it is recommended to run some preliminary trials in order to homologate the TERMO-GI 202.

Finally, TERMO-GI 202 contains more than 80% of raw materials coming from renewable resources (no food grade).

### **TECHNICAL CHARACTERISTICS**

Colour			Amber
Diameter		Mm	3.9 ÷ 0.1
Softening Point	ASTM D 3461	°C	172
Brookfield viscosity (232°C)	ASTM D 3236	Pa s	3.5
Application Temperature		°C	220 ÷ 240*

\*depending on the substrate and the applicator

### **PACKAGING**

20 kg net cardboard boxes, containing 12 reels of around 1.67 kg each.

### **STORAGE AND GUARANTEE**

TERMO-GI 202 can be stored for 12 months if stocked in a cool and dry place and protected from light. When stocked around 5-10°C or below, it is recommended to keep it at 15-20°C for at least for 24 hours before using it.
